

# Connecting Rod Assembly for Internal Combustion Engines

High-performance connecting rod assembly designed for internal combustion engines. It includes a connecting rod, piston pin, and needle roller bearing for efficient power transfer and reliable performance.

## Overview

### High-Performance Engine Component

This connecting rod assembly is precision-engineered for internal combustion engines, focusing on durability and fatigue resistance. The assembly includes a forged high-strength steel connecting rod, a case-hardened piston pin, and a needle roller bearing for efficient power transfer. Designed for demanding operating conditions, it ensures optimal fit and alignment to reduce wear and maintain smooth engine performance.

## Technical Specifications

### Included Components

- Connecting rod
- Piston pin
- Needle roller bearing

### Part Identification

A-02-01-ASTREA-023 • 895 eW

### Construction Materials

Forged Steel, High-Strength Steel

## Performance Features

### Performance Highlights

**1 Case-hardened**

Wear Resistance

**1 Low-friction**

Friction Support
