

Connecting Rod Assembly for Pumps

This connecting rod assembly is designed for use in pumps and other general machinery. It features a robust connecting rod, precision bearings, thrust washers, and a wrist pin bushing.

Product Overview

High-Performance Connecting Rod Assembly

This connecting rod assembly is engineered for use in pumps and general machinery, offering exceptional durability and performance. Constructed from high-strength alloy steel, it is designed to withstand demanding applications where reliability is critical. The assembly includes precision-machined bearings for reduced friction, thrust washers for axial support, and a wrist pin bushing for a secure, reliable connection.

Technical Specifications

Material Composition

- High-strength alloy steel connecting rod
- Precision-machined bearings
- Thrust washers
- Wrist pin bushing

Applications

Pumps • General Machinery • High-Demand Industrial

Part Number

A-02-01-ALFA-023

Model Codes

2JG, W
