

Connecting Rod Assembly with Needle Bearing Cage and Piston Pin

This connecting rod assembly is designed for use in small engines and pumps. It includes the connecting rod, a needle bearing cage, and a piston pin for secure attachment.

Product Overview

High-Precision Connecting Rod Assembly

This connecting rod assembly is engineered for robust performance in small engine or pump applications. It features a complete kit including the connecting rod, a precision needle bearing cage, and a piston pin, ensuring smooth articulation and reliable power transfer. Designed for durability and seamless integration, this assembly is a critical component for maintaining optimal engine efficiency.

Technical Details

Part Number	A-02-01-C800-023
Secondary ID	179

Component Breakdown

Included Components

- Connecting Rod
- Needle Bearing Cage
- Piston Pin

Design Features	Needle Bearing, High-Articulation, Precision Fit
