

Constant Coverage Horn Flare for Audio Systems

This constant coverage horn flare provides consistent sound dispersion in audio systems. Constructed from durable materials, it ensures reliable performance and longevity.

Product Overview

Constant Coverage Horn Flare

This constant coverage horn flare is engineered to provide consistent and uniform sound dispersion across professional audio environments. Designed to optimize sound projection while minimizing unwanted reflections, it ensures clarity and focus for demanding applications. Its robust construction guarantees reliable performance and long-term durability in high-intensity settings.

Performance Features

Key Benefits

- Consistent sound dispersion
- Minimized unwanted reflections
- Focused audio projection
- Durable, long-lasting construction

Build Quality

High-Performance • Durable Construction • Professional Grade

Primary Applications

Live Performances, Public Address Systems, Studio Monitoring
