Product Overview

High-Performance CV Joint

This constant velocity joint is engineered for Lada, VAZ, and UAZ vehicles, ensuring smooth power transmission to the wheels while accommodating varying drive angles. Designed to meet or exceed OEM specifications, this component maintains consistent rotational speed without significant friction increase. The kit includes all necessary hardware, including the boot, clamps, and retaining ring, for a comprehensive repair or replacement solution.

Technical Specifications

Drive Compatibility

Front-Wheel Drive • All-Wheel Drive

Part Number	LD-001
OEM Reference	2110-2215012
Vehicle Compatibility	Lada, VAZ, UAZ

Kit Contents

Components Included

- CV Joint
- Protective Boot
- Clamps
- Retaining Ring
- Installation Hardware

Features

Durability & Design

- Corrosion-resistant yellow coating
- Splined shaft for secure power transfer
- Designed for variable angle transmission
