Product Overview

Automotive Drivetrain and Steering Solutions

This comprehensive set includes essential automotive components for drivetrain and steering systems, featuring constant velocity joints, steering racks, and tie rod ends. These parts are engineered to ensure smooth power transmission, precise steering control, and reliable vehicle handling. Designed for durability and performance, this kit supports critical suspension and chassis functions across various vehicle applications.

Constant Velocity Joint

Key Features	Constant rotational speed, Reduced vibration, Smooth power transfer, Includes retaining nut
Application	Front-wheel drive vehicles and independent rear suspension systems

Steering Rack

Included Components

- Rack and pinion assembly
- Tie rod ends
- Protective boots

Function	Converts rotational motion of the steering wheel into linear motion for wheel turning
-----------------	---

Tie Rod End

Design Features

- Grease fitting for lubrication
- Corrosion resistance
- Durable construction

Compatibility Note

Verify compatibility before purchase
