

Construction and Agricultural Elevator

This elevator is designed for robust performance in agricultural and construction settings. It features a sturdy frame, a heavy-duty lifting mechanism, and enhanced safety features.

Product Overview

Heavy-Duty Material Handling Solution

This robust elevator is engineered specifically for demanding construction and agricultural environments. Designed with a sturdy frame and a heavy-duty lifting mechanism, it provides reliable performance for vertical transport of materials and equipment. Its integrated safety features ensure secure operation, making it an essential asset for improving efficiency and workplace safety on-site.

Technical Specifications

Key Features

- Robust structural frame
- Heavy-duty lifting mechanism
- Integrated safety systems

Model Designation	DO25
Primary Applications	Construction Sites, Agricultural Settings, Material Handling
