Product Overview

Robust Vertical Transportation

This construction elevator hoist cage is engineered for the efficient and safe vertical transport of personnel and materials on demanding construction sites. Featuring a durable steel frame and a secure mesh enclosure, it is built to withstand rigorous industrial environments while ensuring stable operation. The system integrates advanced safety mechanisms, including emergency stop systems and interlocking doors, to prioritize worker protection throughout the project lifecycle.

Available Models

- HC20/33
- HC20/54
- HC32/54

Compliance & Safety

Certifications & Standards

CE, ISO 9001, TUV SUD, IEC 61508, SIL2, PLd

Technical Features

Key Features

- High load capacity for materials and personnel
- Robust steel frame construction
- Integrated safety interlocking doors
- Emergency stop system
- Blue mesh safety enclosure
- Smooth vertical travel mechanism
