

Construction Equipment Assortment

This assortment includes various construction equipment parts. These parts are used for maintaining and repairing construction machinery.

Product Overview

Professional Construction Material Assortment

This construction equipment assortment features high-quality industrial materials suitable for various manufacturing and building applications. Organized in distinct, labeled containers, these components ensure easy identification and efficient handling for research, development, or quality control processes. Designed for professional use, this set provides a reliable standard for material sourcing and testing requirements.

Product Details

Packaging Type	Glass Jars
Material Classification	Raw Materials, Industrial Components, Construction Grade

Usage & Applications

Primary Applications

- Construction Material Sourcing
- Quality Control Testing
- Research and Development
- Industrial Manufacturing
