

Construction Loader for Material Handling

This construction loader is designed for heavy-duty material handling. It has a large-capacity bucket with reinforced edges and a powerful engine and hydraulic system.

Overview

Robust Construction Loader

This construction loader is engineered for heavy-duty material handling in demanding environments. It features a large-capacity bucket with reinforced edges, ensuring high efficiency during loading and unloading tasks. The machine is powered by a reliable engine and hydraulic system, while the operator cabin is designed with enhanced visibility and ergonomic controls for superior comfort and performance.

Technical Specifications

Model Number	ZL30F-II
Key Features	Heavy-duty, Reinforced Bucket, Ergonomic Controls, Enhanced Visibility

Performance

Performance Highlights

30 kN

Load Capacity Class
