

Construction Machinery Roller Chain

This high-strength roller chain is designed for heavy-duty applications in construction machinery. It features robust construction with precision-engineered components for reliable performance and extended service life.

Product Overview

High-Strength Construction Machinery Roller Chain

This high-strength roller chain is precision-engineered for heavy-duty applications in construction machinery, including loaders, excavators, and bulldozers. Designed for reliability and extended service life, it excels in demanding environments that require superior tensile strength and wear resistance. Its robust construction ensures consistent performance under heavy operational loads.

Technical Specifications

Key Performance Features

- High tensile strength
- Superior wear resistance
- Precision-engineered components
- Heavy-duty construction

Durability Rating

Heavy-Duty • High-Strength

Compatible Machinery

Loaders, Excavators, Bulldozers
