

# Construction Machinery Scarifier Blades

High-performance scarifier blades designed for construction machinery. These wear-resistant attachments are engineered for efficient material removal and surface preparation.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Scarifier Blades

These heavy-duty scarifier blades are precision-engineered for efficient material removal and surface preparation in demanding construction environments. Crafted from high-strength alloy steel, they offer exceptional durability and resistance to impact, ensuring a consistent scarification depth and pattern. Designed for professional use, these blades provide extended wear life for applications including road maintenance, asphalt milling, and concrete demolition.

## Technical Specifications

### Key Performance Indicators

<b>1 High</b> Wear Resistance	<b>1 High</b> Impact Resistance
----------------------------------	------------------------------------

<b>Material Composition</b>	High-strength alloy steel
<b>Primary Applications</b>	Road Maintenance, Asphalt Milling, Concrete Demolition, Surface Preparation

## Compatibility

### Compatible Equipment Types

- Rotary drilling rigs
- Skid steer augers
- Piling rigs
- Trenchers
- Wall cutters
