Overview

Heavy-Duty Tandem Axle Suspension

This heavy-duty suspension system is engineered specifically for demanding construction machinery applications, including loaders, excavators, and bulldozers. Featuring a robust tandem axle configuration with integrated leaf springs, it provides reliable performance under significant stress. Designed for a 16-ton load capacity, this system ensures durability and stability in challenging work environments.

Technical Specifications

Load Capacity

16 T

Load Capacity

Suspension Type

Tandem Axle with Leaf Spring

Compatibility

Compatible Machinery

Loader, Excavator, Bulldozer

Design Features

Design Highlights

- Tandem axle configuration
- Leaf spring mechanism
- Robust mounting brackets
- Heavy-duty construction
