Product Overview

Robust Track Protection

These heavy-duty track guards are engineered to provide superior protection for construction machinery under-carriage systems. Constructed from high-strength steel with a durable, corrosion-resistant finish, they effectively shield tracks from damage caused by debris, rocks, and uneven terrain. Their precise fit and reinforced mounting points ensure stable attachment and long-term reliability in demanding construction environments.

Technical Specifications

Material	High-strength steel
Key Features	Corrosion-resistant, Reinforced mounting, Welded construction, Debris protection

Compatibility

Compatible Machinery Models

- DH220
- DH300
- ZX360

Manufacturing History

Factory Experience

2003 Year
