

Construction Site Dumper Tipper

This dumper tipper is a robust construction machine designed for efficient material transportation. It features a heavy-duty chassis and a spacious tipping bed for quick unloading.

Product Overview

Robust Construction Site Dumper

The FY20 dumper/tipper is a robust construction machine engineered for efficient material transportation across diverse construction site terrains. It features a heavy-duty chassis and a powerful engine designed for reliability and minimal downtime. The spacious tipping bed allows for quick and easy unloading, while the operator cabin prioritizes safety and comfort with excellent visibility.
