

Container Flat Wagon for Intermodal Transport

This container flat wagon is designed for the efficient and secure transportation of intermodal containers. The robust flatbed construction includes integrated container locking mechanisms to ensure stability during transit.

Overview

Professional Intermodal Transport Solution

The X3TEU Container Flat wagon is a specialized railway vehicle engineered for the secure and efficient transit of intermodal containers. Its robust flatbed architecture features integrated locking mechanisms to ensure maximum stability and prevent load shifting. With a low-profile design that accommodates high-cube containers, this wagon is optimized for modern logistics efficiency and safety compliance.

Technical Specifications

Design Advantages

- Integrated container locking mechanisms
- Low-profile structural design
- Robust flatbed construction
- High-cube container compatibility

Vehicle Category	Container Flat Wagon
Primary Use	Intermodal Transport, Freight Logistics, High-Cube Container Transit

Compliance and Safety

Certifications

Railway Safety Standards Compliant
