

Container Transport Trailer

This trailer is designed for transporting large containers. It features a standard shipping container, likely 40 feet in length, and is equipped with three axles and six wheels.

Product Overview

Robust Container Transport Solution

This three-axle container transport trailer is engineered for the reliable logistics of large shipping containers. Built with a durable frame and a high-capacity six-wheel design, it provides optimal stability for heavy-duty transport operations. The unit is designed to accommodate 40-foot standard shipping containers, making it a versatile asset for international supply chain and distribution networks.
