

Containerized Diesel Generator Set, 18kW-2660kW

This diesel generator set is available in a range of 18kW-2660kW with 50Hz/60HZ, 230V/400V, 3P, 0.8pf configurations. The containerized unit is designed for easy transportation and quick deployment.

Product Overview

Robust Mobile Power Solutions

These containerized diesel generator sets provide a versatile and mobile energy solution designed for rapid deployment in demanding environments. Housed within durable, weather-resistant containers, the units ensure reliable operation in remote locations, industrial sites, or as emergency backup power. With advanced ventilation systems and secure maintenance access, these stations are engineered for performance and longevity.

Performance Specifications

Power Output Range

18 kW

Minimum Power

2660 kW

Maximum Power

Design & Construction

Access Features

- Secure maintenance access doors
- Designed for quick deployment
- Robust mobile chassis

Housing Type

Weather-resistant containerized unit

Ventilation System

Integrated louvered ventilation for optimal airflow

Applications

Recommended Applications

Remote Locations, Emergency Power, Industrial Applications, Mobile Power
