

Containerized Ice Maker and Crusher

This containerized unit produces and crushes ice for commercial applications. It is housed in a weatherproof container with double doors and a ventilation system.

Overview

Industrial Containerized Ice Solution

This specialized ice maker and crusher unit is engineered for high-capacity industrial and commercial applications. Housed within a robust, weatherproof container, the system ensures both portability and long-term protection of sensitive internal components. With integrated ventilation and accessible double-door entry, this unit is designed for reliable, large-scale ice production and processing in demanding environments.

Design & Build

Housing Type	Containerized
Weatherproofing	Yes
Accessibility Features	Double Doors, Easy Maintenance Access

Operational Features

Primary Applications

- Industrial Ice Production
- Commercial Ice Processing
- Large-scale Operations

Ventilation System	Yes
