

Continuous Band Sealer

The continuous band sealer is designed for sealing thermoplastic materials. It features adjustable temperature and speed controls, and a horizontal configuration with a conveyor belt for continuous feeding of bags.

Product Overview

Continuous Band Sealing Solution

This continuous band sealer is engineered for high-efficiency sealing of thermoplastic materials. Featuring a horizontal configuration with an integrated conveyor belt, it ensures a smooth, continuous feeding process for various bag types. The system utilizes precise heating elements and pressure rollers to create strong, airtight seals, making it an ideal choice for professional packaging applications.

Technical Specifications

Configuration

Horizontal

Sealing Method

Continuous horizontal band sealing

Compatible Materials

Thermoplastic

Performance Features

Adjustable Controls

- Temperature control
- Conveyor speed control

Performance Highlights
