

Continuous Food Spiral Freezer

The spiral freezer is designed for continuous freezing of food products. It features a compact, space-saving design with a spiral conveyor belt that maximizes freezing capacity within a small footprint.

Product Overview

Continuous Food Spiral Freezer

This industrial spiral freezer is engineered for the high-efficiency, continuous freezing of various food products. By utilizing a sophisticated spiral conveyor system, the unit maximizes throughput while maintaining a compact physical footprint. It incorporates advanced, patented energy-saving refrigeration technology to ensure uniform freezing and superior product quality retention.

Suitable Applications

Meat processing, Poultry, Seafood, Prepared meals

Operational Features

Freezing Technology

Continuous Processing • Patented Energy-Saving • Uniform Rapid Freezing

System Control

- Adjustable freezing time
- Precise temperature control

Design Specifications

Construction Standards

High-durability materials designed for hygienic operation and simplified maintenance
