Overview

Continuous Motion VFFS Solution

This Continuous Motion Vertical Form Fill Seal (VFFS) machine is engineered for high-speed automated packaging across food, pharmaceutical, and chemical industries. Built with durable, food-grade stainless steel, it ensures hygiene and long-term reliability. The system integrates precise PLC control with a user-friendly touchscreen interface, offering seamless adjustments for bag size, sealing temperature, and filling speed to optimize production efficiency.

Technical Specifications

Suitable Product Types

- Snacks
- Candies
- Powders
- Granules

Construction Material

Stainless steel and food-grade materials

Control System

Programmable Logic Controller (PLC) with touchscreen interface

Safety Features

Safety Interlocks, Protective Guards

Performance Metrics

Operational Capabilities

1 Enabled

Continuous Motion Mode

1 Included

Multi-head Weigher Integration

Adjustable Parameters

Parameter	Function
Bag Size	Adjustable
Fill Volume	Adjustable
Sealing Temperature	Adjustable
Filling Speed	Adjustable
