

Continuous Rim Core Drill Bits for Tile and Glass

These core drill bits feature a continuous rim for smooth cuts in brittle materials. Sintered diamond grit ensures aggressive cutting action and a long service life.

Product Overview

Precision Cutting Solutions

These sintered continuous rim core bits are engineered for professional-grade drilling in challenging, brittle materials such as tile and glass. The continuous rim design ensures a smooth, chip-free cutting action that maintains the integrity of the surface being drilled. Featuring high-quality sintered diamond grit, these bits deliver both aggressive performance and an extended service life for high-volume use.

Technical Specifications

Manufacturing Process	Sintered
Rim Design	Continuous Rim

Application

Compatible Rotary Tools

- Electric drills
- Rotary tools

Suitable Materials	Tile, Glass
