

# Continuous Rim Diamond Saw Blade

This diamond saw blade features a continuous rim for smooth cuts. It is suitable for cutting concrete, brick, stone, granite, sandstone, and hard ceramics in both dry and wet applications.

## ADDITIONAL IMAGES

## Product Overview

### Professional Diamond Cutting Performance

This continuous rim diamond saw blade is engineered for precision and durability in professional cutting applications. Designed for versatility, it supports both dry and wet cutting methods, making it an essential tool for handling materials like concrete, brick, stone, granite, sandstone, and hard ceramics. The continuous rim design ensures smooth, chip-free cuts, providing high-quality results for demanding projects.

## Technical Specifications

### Cutting Method

Dry Cutting • Wet Cutting

### Performance Metrics

**80 m/s**

Max Linear Speed

**13200 RPM**

Max Speed (115mm)

**8600 RPM**

Max Speed (180mm)

### Blade Dimensions

Diameter	Arbor Size
115 mm	22.23 mm
180 mm	22.2 mm

### Suitable Materials

Concrete, Brick, Stone, Granite, Sandstone, Hard Ceramics

## Packaging Options

### Available Packaging

- Blister card
- Double blister card
- PVC pouch
- Skin card
- Color box
