

Continuous Rim Diamond Saw Blade

This diamond blade is designed for cutting a variety of materials including tile, stone, and concrete. It features a continuous rim for smooth, chip-free cuts and an optimized diamond matrix for extended blade life.

Product Overview

Professional Diamond Saw Blade

This high-performance continuous rim diamond saw blade is engineered for precision and clean cutting across various challenging materials. It is specifically designed to handle ceramic tiles, porcelain tiles, and marble with ease, minimizing chipping for a professional finish. Built with a high-strength steel core, the blade offers excellent stability and reduced vibration, making it a reliable choice for demanding cutting tasks.

Technical Specifications

Design Features

- Continuous rim for chip-free cuts
- High-strength steel core for stability
- Optimized diamond matrix for extended life
- Integrated cooling slots to prevent warping

Operation Mode

Wet Cutting • Dry Cutting

Compatible Materials

Ceramic Tile, Porcelain Tile, Marble, Stone, Concrete
