

Continuous Rim Diamond Saw Blade

This continuous rim blade is designed for smooth, chip-free cutting of materials such as tile, ceramic, porcelain, and glass. The continuous rim provides constant contact with the material, resulting in clean and precise cuts.

Product Overview

Continuous Rim Diamond Saw Blade

This continuous rim diamond saw blade is engineered for smooth, chip-free cutting of materials including ceramic tiles, porcelain, and marble. Featuring a steel core for enhanced durability and stability, the diamond-impregnated rim ensures long-lasting performance and consistent contact with the material. Designed for both professional and DIY applications, this blade minimizes vibration and reduces noise, making it an ideal choice for wet cutting with angle grinders and tile saws.
