

Continuous Rim Diamond Saw Blade

This diamond saw blade provides smooth, precise cuts on ceramic tile, porcelain, marble, and granite. It features a durable steel core and diamond grit for efficient material removal and extended blade life.

Product Overview

Precision Cutting Performance

This continuous rim diamond saw blade is engineered for smooth, precise cutting of hard materials including ceramic tile, porcelain, marble, and granite. Featuring a durable steel core and high-concentration diamond grit, it offers extended blade life and efficient material removal. Designed to minimize chipping, this blade ensures clean, accurate results for professional applications.

Technical Specifications

Compatible Materials

- Ceramic Tile
- Porcelain
- Marble
- Granite

Compatible Tools

- Angle Grinders
- Tile Saws

Cutting Application

Wet Cutting, Dry Cutting

Design Features

Rim Type

Continuous Rim

Core Construction

Durable Steel Core
