

Convection Oven Controller Board

This controller board is designed for convection ovens. It manages the heating and fan functions, ensuring precise temperature control and operation.

Product Overview

Universal Light Wave Furnace Control System

The B12020003 control board acts as the central intelligence for light wave convection furnaces, designed for universal compatibility and ease of replacement. It features versatile cooking modes and granular power adjustments to support diverse culinary applications. With a focus on maintenance efficiency, this board allows for jumper-based configuration to match various heat pipe power requirements.

Technical Specifications

Power Modes

- 100W
- 500W
- 800W
- 1200W
- 1800W

Control Panel Dimensions

Component	Dimensions (mm)
Control Panel 1	117 x 42
Control Panel 2	85 x 62

Maximum Power	1800 W
---------------	--------

Features

Keep Warm Duration

- 15
- 30
- 60
- 90
- 120

Cooking Modes	Soup/Porridge, Chafing Dish, Barbecue, Stir Fry
---------------	---

Installation Guidelines

Cautions

- Test the fan after installation
- Connect temperature-controlled resistance to metal under heating plate
- Do not position the handle in the center of the heating plate
- Short out high-power jumper when using low-power settings
