

Convection Space Heater with Adjustable Thermostat

This convection space heater is designed for home use. It features an adjustable thermostat and multiple heat settings.

Overview

Efficient Convection Heating

This convection space heater utilizes advanced mica heating technology to provide rapid and energy-efficient warmth for your living space. Designed with safety as a priority, it includes built-in protection against overheating and an automatic tip-over switch. The unit features an adjustable thermostat, allowing users to easily maintain their desired comfort level.
