

Convolute Wheel 16 x 1/2 x 10 Inch

This convolute wheel measures 16 inches in diameter, 1/2 inch in thickness, and has a 10-inch arbor hole. Constructed from premium abrasive materials, it delivers consistent performance and superior surface finishes on various materials, including metals, composites, and plastics.

Product Overview

High-Performance Convolute Wheel

These convolute wheels are engineered for demanding grinding and finishing applications, providing exceptional durability and consistent performance. Constructed from premium aluminum oxide abrasive materials, they deliver superior surface finishes across a wide range of materials including metals, composites, and plastics. Designed for efficiency, these wheels offer excellent stock removal rates and an extended service life for industrial use.

Dimensions

Diameter	16 inch
Thickness	0.5 inch
Arbor Hole	10 inch

Technical Specifications

Primary Applications

- Rough Grinding
- Surface Finishing
- Stock Removal

Abrasive Material	Aluminum Oxide
Compatible Materials	Carbon Steel, General Steel, Malleable Cast Iron, Hard Bronze, Composites, Plastics
