

Coolant Tank Cleaning Solution

This specialized cleaning solution is designed for automotive coolant tanks, removing scale, rust, and other contaminants. It ensures efficient heat transfer and prevents overheating, thereby extending the lifespan of cooling system components.

Product Overview

Professional Cooling System Maintenance

This specialized cleaning solution is engineered for automotive coolant tanks, effectively removing scale, rust, and other contaminants. By restoring the cleanliness of the cooling system, it ensures efficient heat transfer and helps prevent engine overheating. This product is an essential tool for professional automotive maintenance and repair services looking to extend the lifespan of cooling system components.

Technical Specifications

Capacity	10 kg
Application	Automotive, Cooling System Maintenance, Scale Removal, Rust Removal

Key Benefits

System Performance

100 %

Contaminant Removal Efficiency
