

Cooling Fan for Electronic and Industrial Use

This cooling fan is designed for effective heat dissipation in electronic and industrial applications. Its square frame includes mounting holes for easy installation, and its optimized blade design ensures efficient airflow.

Product Overview

Industrial Cooling Solution

This cooling fan is specifically engineered for high-performance electronic and industrial cooling applications. Its compact design features an optimized blade impeller system that ensures effective heat dissipation even in tight spaces. Built with durable materials, it provides reliable and consistent cooling to maintain optimal operating temperatures for critical equipment.

Physical Specifications

Frame Shape	Square
Mounting	Four-corner mounting holes

Key Features

Primary Advantages

- Optimized blade geometry for high airflow
- Durable construction for long service life
- Space-saving compact profile
- Easy installation layout

Recommended Use	Electronics Cooling, Industrial Equipment, Enclosed Spaces
