

Cooling Fan for Electronics

This compact cooling fan is designed for various applications. It features a durable frame and optimized blade design for maximum airflow and minimal noise.

Product Overview

High-Efficiency Thermal Management

The TA18060 cooling fan is a compact and efficient solution engineered for diverse electronic applications. Designed with a durable frame and an optimized blade profile, it ensures maximum airflow while maintaining minimal operational noise. This unit is essential for reliable thermal management in enclosures and sensitive electronic devices, effectively extending the service life of critical components.

Technical Specifications

Model Number	TA18060
Key Features	Optimized Airflow, Low Noise, Durable Frame
