

Cooling Fan YM0504PF-66

This compact cooling fan is designed for cooling electronic components and machinery. It features a square frame with mounting holes and an impeller engineered for efficient airflow and low noise levels.

Product Overview

Compact Cooling Performance

The YM0504PF-66 is a compact cooling fan engineered for versatile industrial and electronic applications. Constructed from durable plastic, this unit features a square frame design with integrated mounting holes for quick and secure installation. It is specifically optimized to provide efficient airflow while maintaining low noise levels, making it an ideal cooling solution for sensitive electronic components and machinery.

Technical Specifications

Product Model	YM0504PF-66
Design Features	Square Frame, Compact Design, Low Noise, Mounting Holes
Material	Durable Plastic

Application Suitability

Typical Applications

- Electronic Components
- Industrial Machinery
- Heat-sensitive equipment
