

Cooling System Rust Preventive

Cooling system rust preventive protects against rust and corrosion, ensuring optimal cooling system performance and longevity. It prevents scale build-up and maintains efficient heat transfer.

Product Overview

Cooling System Protection

This cooling system rust preventive is engineered to provide superior protection against rust and corrosion within automotive and industrial cooling systems. By actively preventing scale build-up, it ensures optimal heat transfer efficiency and extends the operational lifespan of your cooling components. It is a versatile solution suitable for a wide range of cooling system types.

Technical Specifications

Application Suitability

All Cooling Systems

Net Volume

354 ml

Key Features

Anti-Rust, Anti-Charge Blocking, Scale Prevention, Corrosion Protection
