

Copper Bushing for Electronics

This copper bushing is designed for use in electronic accessories, offering both conductivity and corrosion resistance. It can be used for shielding, grounding, or providing mechanical support within electronic devices.

Product Overview

High-Performance Copper Bushing

This precision-engineered copper bushing is designed specifically for demanding electronics applications, offering excellent conductivity and mechanical support. Constructed from high-quality red copper, it provides superior corrosion resistance for long-term reliability. The component features a degreased surface finish and is fully compliant with RoHS 2.0 standards, making it an ideal choice for modern electronic manufacturing.

Technical Specifications

Outer Diameter Range

20 mm

Min OD

25 mm

Max OD

Thickness Range

0.2 mm

Min Thickness

0.25 mm

Max Thickness

Material

Red Copper

Compliance & Finish

Compliance

RoHS 2.0 Compliant

Surface Treatment

Degreased
