

Copper Electric Personal Tricycle with Canopy

This electric tricycle is designed for personal transportation. It has a three-wheel configuration for stability and includes a front basket and rear canopy.

Overview

Designed for Comfort and Utility

The TDS988Z-9KD electric tricycle offers a stable and accessible transportation solution, featuring a convenient step-through frame design. Equipped with a reliable electric motor, it provides assisted propulsion to make travel effortless for personal use. The inclusion of a rear canopy and front basket enhances usability, protecting riders from the elements while providing essential storage space.
