Product Overview

High-Performance Copper Sealing Solutions

These copper crush washers are engineered to provide a reliable, high-integrity seal for automotive oil drain plugs. Designed to deform upon tightening, they conform perfectly to surface irregularities, ensuring a leak-free connection during oil changes and routine maintenance. Their durable, corrosion-resistant construction makes them an essential component for long-term automotive reliability.

Technical Specifications

Sealing Type

Crush Washer • Deformable Seal

Common Applications

- Oil Drain Plugs
- Automotive Maintenance
- Engine Oil Changes

Material

Copper
