

Copper Tubing for HVAC and Refrigeration

Copper tubing is ideal for plumbing, HVAC, and refrigeration applications. Its smooth interior ensures optimal flow and minimizes pressure drop.

Product Overview

High-Performance Copper Tubing

This premium copper tubing is engineered for versatility and reliability in HVAC, refrigeration, and plumbing systems. Featuring exceptional thermal conductivity and corrosion resistance, it ensures long-term durability in both residential and commercial installations. Its smooth interior surface promotes optimal fluid flow, significantly minimizing pressure drop to enhance overall system efficiency.

Technical Specifications

Compatible Applications

- HVAC Systems
- Refrigeration
- Plumbing Installations

Market Segment

Residential • Commercial

Key Features

Thermal Conductivity, Corrosion Resistant, Smooth Interior Flow, HVAC Ready, Refrigeration Grade
