

Corded Electric Drill - 10mm Chuck, Variable Speed

This corded electric drill has a 10mm (3/8 inch) chuck. It features a variable speed trigger and forward/reverse switch for drilling into wood, metal, and plastic.

Overview

Professional Grade Corded Drill

This corded electric drill features a robust 10mm chuck and variable speed control, designed for reliable performance in various drilling applications. Built with a die-cast metal gear housing and full ball-bearing construction, it offers the durability required for demanding jobsite environments. The ergonomic design includes a glass-filled nylon housing and a two-finger trigger to ensure user comfort and precise control during extended operation.

Technical Specifications

Chuck Capacity	10 mm
Speed Control	Variable speed trigger

Construction & Durability

Build Features	Die-cast metal gear housing, Full ball-bearing construction, Glass-filled nylon housing, Impact resistant
