

Corded Jigsaw for Wood, Plastic, and Metal

This corded jigsaw is designed for cutting wood, plastic, and metal with precision. Features include variable speed control, an adjustable base plate for bevel cuts, and a dust extraction port for a cleaner work environment.

Overview

Precision Cutting Performance

This corded jigsaw is engineered for versatile cutting applications across wood, plastic, and metal materials. Featuring variable speed control and an adjustable base plate for precise bevel cuts, it offers the flexibility required for professional tasks. The integrated dust extraction port ensures a cleaner workspace, while the ergonomic handle design enhances comfort and control during extended operation.

Technical Specifications

Compatible Materials	Wood, Plastic, Metal
Blade System	Standard T-shank jigsaw blades

Features

Key Features

- Variable speed control
- Adjustable base plate for bevel cuts
- Integrated dust extraction port
- Ergonomic handle design

Operational Benefits

Precision Cutting • Dust Management • Ergonomic Grip
