

# Corded Power Drill with Variable Speed

This corded power drill provides reliable power and variable speed control for diverse drilling applications. It features an ergonomic design, including a side handle, to ensure stability and precision.

## Product Overview

### Professional Grade Drilling Performance

This corded power drill is engineered for consistent performance across a wide range of materials. Equipped with variable speed control, it allows users to match the drilling speed to the specific task, ensuring precision and preventing material damage. The included side handle provides enhanced stability and control during heavy-duty applications, making it an essential tool for professional construction and maintenance work.

## Technical Specifications

### Control Features

- Variable speed trigger
- Adjustable side handle for stability

### Power Source

Corded Electric

### Key Capabilities

Variable Speed, Precision Drilling, Heavy-Duty Control
