

# Corded Random Orbital Sander

This corded power tool is designed for sanding applications on wood, metal, and plastic surfaces. It features a random orbital action for efficient material removal and a smooth finish.

## ADDITIONAL IMAGES

## Product Overview

### Professional Sanding Performance

This corded random orbital sander is engineered for efficient material removal and achieving a smooth, swirl-free finish on a variety of surfaces including wood, metal, and plastic. Designed with user comfort in mind, it features an ergonomic two-handled grip and a rear D-handle for safe, controlled operation during extended work sessions. The integrated dust extraction system, compatible with both dust bags and vacuum cleaners, ensures a cleaner workspace for professional results.

## Key Features

### Ergonomics & Handling

- Ergonomic design for two-handed operation
- Rear D-handle for safe handling
- Soft grip handle for increased comfort
- Lock-on function for continuous operation

### Operational Features

- Random orbital action for smooth finishes
- Sanding paper clamping system with lever for quick replacement
- Dust extraction system (compatible with dust bag or vacuum)

## Compliance and Standards

Certifications	CE, EAC
Origin	Made in PRC
