

Corded Wood Router

This electric router is a versatile power tool used for woodworking and other applications. It features a powerful motor for smooth and efficient cutting, shaping, and trimming of various materials.

Product Overview

Professional Woodworking Performance

This high-performance corded wood router is designed for precision cutting, shaping, and trimming in professional woodworking environments. Featuring a robust 2100W motor, it delivers consistent power for demanding tasks, while the adjustable speed range ensures optimal control across various materials. Its ergonomic design and stable construction make it an ideal tool for creating intricate designs, grooves, and decorative edges.
