

# Cordless Angle Grinder with Brushless Motor

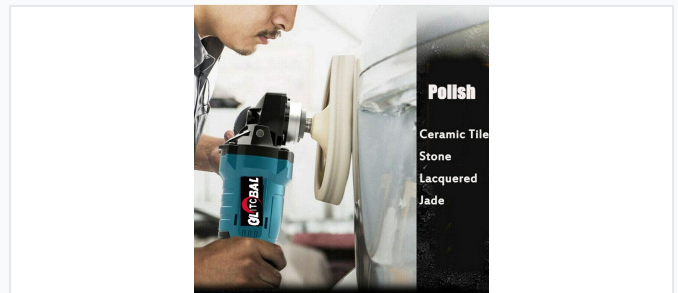

This cordless angle grinder features a brushless motor for enhanced performance and durability. It is powered by a DC20V Max Li-Ion battery, providing cordless convenience for grinding and cutting applications.

## ADDITIONAL IMAGES

## Product Overview

## Professional Cordless Performance

This professional-grade cordless angle grinder features a high-efficiency copper core brushless motor designed to provide stable, anti-overload performance while preventing overheating. Engineered for versatility, it is ideal for metal cutting, grinding, tile work, and polishing tasks in tight or overhead spaces. The lightweight, ergonomic design includes a non-slip handle to reduce operator fatigue during extended use.

## Technical Specifications

### Metal head shell

Thick alloy head shell, durable.

### Protective cover

Prevent sparks during use and protect operator safety.

### No-load Speed Options

- 4500
- 5500
- 7000

### Speed Control Applications

Speed (rpm)	Recommended Use
4500	Polishing
5500	Cutting
7000	Sanding

Input Voltage	18 V
Disc Diameter	115 mm
Motor Technology	Brushless Motor #5030

## Power & Battery

Battery Type	Lithium-Ion
Available Battery Capacities	2000mAh, 3000mAh, 4000mAh

## Features & Compliance

### Certifications

GS • CE • EMC • ROHS • UL • BSCI

### Package Contents

- Angle Grinder
- Auxiliary Handle
- Protective Baffle
- Wrench
- Strong BMC Case
