

Cordless Brushless Angle Grinder

This cordless angle grinder is designed for grinding, cutting, and polishing. It features a brushless motor for enhanced efficiency and durability.

Product Overview

Professional Cordless Grinding Solution

This 18V Cordless Brushless Angle Grinder is engineered for high-performance cutting, grinding, and polishing tasks without the constraint of power cables. Featuring an advanced brushless motor, it delivers enhanced efficiency, extended runtime, and superior durability for demanding professional environments. The ergonomic design, including a specialized handle with integrated key storage, ensures maximum control and user comfort during extended operation.

Performance Metrics

Key Performance Indicators

18 V

Operating Voltage

8500 RPM

No-Load Speed

115 mm

Max Disc Diameter

Technical Specifications

Motor Technology

Brushless Motor • High Efficiency

Spindle Thread

M14

Power Source

18V Lithium-Ion Battery

Design & Ergonomics

Key Features

- Ergonomic grip for reduced fatigue
- Integrated key storage in the handle
- Spindle lock for quick disc changes
- Tool-free guard adjustment
- Auxiliary side handle for improved control

Applications

Suitable Applications

Grinding, Cutting, Polishing, Metalworking, Construction
