Product Overview

High-Efficiency Cordless Polishing

This 12V cordless car polisher combines high torque with a lightweight, ergonomic design for professional-grade results. Featuring variable speed control between 2500 and 5000 RPM, it allows users to tailor the polishing intensity to specific paint conditions, such as removing swirls, scratches, and oxidation. The unit is engineered for efficiency and ease of use, making it an ideal tool for automotive detailing.

Technical Specifications

Rated Current

2 A

Device Current

2.4 A

Charger Output

Variable Speed Range

5000 RPM

Operating Voltage

12 V

Power & Charging

Charger Input

230V 50Hz

Charging Time

1 hour

Charger Output Power

38 W

Features & Protection

Safety Protections

- Temperature Protection
- Voltage Protection
- Current Protection

Certifications

GS, CE, EMC
