

Cordless Circular Saw

This cordless circular saw has a high-performance motor for fast cutting and ripping. It features a lightweight design, ergonomic handle, and adjustable bevel settings.

Overview

High-Performance Cordless Cutting

This cordless circular saw is engineered for efficient cutting and ripping tasks in professional environments. Its lightweight, ergonomic design ensures operator comfort during extended use, while the adjustable bevel settings provide the versatility needed for various cutting angles. Built with durability in mind, it features a robust blade guard and a convenient spindle lock system for rapid, safe blade changes.
