

Cordless Electric Garden Tiller Cultivator with Li-Ion Battery

This cordless tiller cultivator features a copper gearbox and a powerful blade system. Its lightweight design and rechargeable lithium-ion battery provide portability for various gardening tasks.

ADDITIONAL IMAGES

Product Overview

The cordless design provides enhanced mobility for tilling in gardens and agricultural settings.

Efficient Cordless Soil Preparation

This 18V cordless garden cultivator is designed for effortless soil preparation in gardens and small agricultural plots. Part of a versatile lithium-ion battery family, it offers the freedom to work anywhere without restrictive power cables. Its lightweight design and adjustable handle ensure comfortable operation while effectively incorporating organic matter or breaking up soil.
