

Cordless Electric Kettle with 360° Rotation

This electric kettle features a 360° rotation base for ease of use. The cordless design allows for convenient serving.

Product Overview

Professional Cordless Electric Kettle

This stainless steel cordless electric kettle is designed for efficiency and ease of use in professional or commercial environments. Featuring a precision gooseneck spout, it allows for controlled pouring, while the 360-degree rotational base ensures convenient handling from any angle. Its rapid-boil capability and cordless design make it an essential tool for quick hot water preparation.
